

TOOLS OF THE TRADE

FREE IRON

While turf managers search for a product that can deliver color quickly to turf without unwanted surge growth, Lebanon-Turf introduces 4 Iron 10-0-0 to its Nutri-Foliar line of fertilizers. This completely soluble crystalline concentrate fertilizer delivers a carefully designed micronutrient package featuring chelated iron, documented to enhance color in turf within hours of application and hold color for an entire month. NutriFoliar is ideal for greens, tees, fairways, athletic fields, and other high amenity turf.

Additional benefits include its compatibility with a wide variety of products, its

complete solubility allows the product to be added to spray tanks or fertigation systems without any concern of clogging filters or screens.

For a limited time, experience the staying power of 4 Iron through Lebanon-Turf's Trial Program. Qualified turf managers can receive one free five pound bag of 4 Iron, 10-0-0, enough product to treat up to one acre. Participants of the trial program will qualify to win a \$50 VISA gift card. For more information, visit www.lebsea.com and follow the link for the NutriFoliar promotion. ▼

TERRIFIC TURF

A new company, g2 turftools, inc., has begun the production of precision turf equipment for sports fields and golf courses. The g2 turfroller was designed to compact soil and newly-installed sod on athletic

fields, golf courses and even commercial landscaping projects in a cost effective manner. It is also used on existing turf after athletic events; clay tennis courts; golf course fairways and tee boxes; and baseball warning tracts and base lines.

A feature of this tractor attachment includes hydraulic wheels to easily transport the turfroller from one location to another. Other features are rounded roller edges to eliminate cutting the turf, front and rear scrapper blades, grass catchers and extra large filler holes. For more information, visit www.g2turftools.com. ▼

WEED WHACKER

PBI/Gordon Corporation has announced that Q4 Turf Herbicide for Grassy and Broadleaf Weed Control is now available in California. This

and broadleaf weed control in established turf-grass areas. The

RADICAL RAKE

TRG, Inc. has announced the release of a new line of Groundskeeper II rakes that are lighter in weight than most standard rakes. The handles are made of fiberglass and the heads are made of co-polymer materials. The heaviest model weighs in at about two pounds, making it far less cumbersome and extremely durable. Additionally, the tines are positioned at an aggressive angle, eliminating the need to exert as much pressure, thus easing the pressure on the back and arms.

The rakes come with a swivel hanger at the end making it easy to hang for storage. Four models are offered: The Groundskeeper II, shrub rake, spot rake, and gardener rake. For more information, visit at www.the-groundskeeperII.com, or contact TRG, Inc. via email at trginc@prairieinet.net or call 515.987.4828. ▼
